**T**HERE will be four *Eclipses* this Year, viz. two of the *SUN*, and two of the *MOON*; in the following order, viz.

I. The first will be of the *Sun*, on Tuesday the 15th day of May, at 22 minutes past 3 o'clock in the afternoon, invisible to us; but the *Sun* will be centrally eclipsed on the Meridian, at 2h. 57m. P.M. in Long. 44 deg. 8m. West from Boston, and Lat. 49 deg. South. This Eclipse happens in 25 deg. 8m. of  $\gamma$  and the D's lat. is 49 and one half minute South.

II. The second will be of the *Moon*, on Tuesday the 29th day of May, at 18 min. past 1 o'clock afternoon; in itself total, but below the horizon, ergo invisible. It happens in the 9th degree of the celestial *Archer*.

III. The third will be of the *Sun*, on Wednesday the 7th day of November, at 9h. 9m. afternoon; invisible to us: But the *Sun* will be totally and centrally eclipsed on the meridian, at 42m. past 8 o'clock afternoon, in Long 130 degrees 23m. West from Boston, and Lat. 46 and an half deg. North. It happens in the 16th degree of the celestial *Scorpion*. D's latitude 49, 4 fifts min. North.

IV. Fourth and last will be of the *Moon*, on Friday the 23d day of November, partly visible. The Eclipse begins at 27m. past 6 o'clock in the morning; and the *Moon* will set when the *Sun* rises, at 19 minutes past 7; so that only the beginning will be seen by us. The *Moon* will set 4, an 1-2 digits eclipsed, 52 minutes after the Eclipse begins. The greatest obscuration 7 digits 50 min. on D's south limb.

*Useful and necessary* TABLES.

By an Act of the Commonwealth of *Massachusetts*, all Money Accounts after the 1<sup>st</sup> Day of September 1795, are to be the *Dollar, Cent & Mille*; the following TABLE shewing the Number of Cents, and Decimal Parts of Cents (or Milles) in any Number of Shillings and Pence to the amount of a *Dollar*, at 6*s.* being the Currency of said Commonwealth, is therefore very useful for that Purpose. — The Act is not to nullify any Account originally made, or to be made, or any Note, Bond, or other Instrument, expressed in any Money of Account, but they are to be reduced to Dollars and parts, before any Suit at Law can be had thereon. —

The Fees for funeral services are fixed by the Selectmen.

Deaths and Births are, by law to be recorded by every Town and District Clerk throughout the Commonwealth.

In the Town of Boston there are upwards of 50 Hackney Coaches; they are very neat and genteel, handsomely painted, and are all numbered; they are employed either to attend Funerals, or carrying of Passengers, to or from any part of the Town or Country, at stated Rates.

By a law of this Commonwealth, The major part of the Selectmen are authorized and empowered to make such rules and regulations, establishing the rates and prices to be paid for the carriage and conveyance of persons in said Hackney Coaches, within the limits of the town of Boston, as they may from time to time judge reasonable, regard being had to the time and distance. And if any owner or driver of a Hackney Carriage shall demand and extort, from any person or persons, a sum beyond the rates which may thus be established by the said Selectmen, the licence of such carriage, upon complaint made to the Selectmen as aforesaid, after a due hearing, may be forfeited and revoked, and the owner will be further liable to refund the sum thus received and extorted to the party grieved. And all the penalties and forfeitures aforesaid may be recovered in an action on the case before any Justice of the Peace for the County of Suffolk, to the use of the person who shall sue for the same.

All Hackney Carriages must be numbered and registered in a book kept by the Town-Clerk, and the number of each carriage fixed on the same, in such conspicuous place or places as the Selectmen shall direct.

Any Person who shall set up or use any Hackney Carriage for the purpose aforesaid, without having obtained a license, or having obtained a license, shall continue to keep and use such carriage after said license is revoked, will forfeit, for every time such carriage is so used, a sum not exceeding four dollars.

The Dispensary, is kept at the Sign of the Good Samaritan.

THE Institution of the Boston Dispensary, has very much served the cause of humanity. The poor and indigent sick are supplied with both Medicine and Attendance gratis. Advice may be had for four days in the week, at Dr. Bartlett's Medicine Store, No. 61, Cornhill, where an experienced Physician attends; and if necessary, will wait upon the patients, at their own homes.

Any persons of whatever age or description, who are in necessitous circumstances, and stand in need of either Medicine or Advice, by obtaining an order from any one of the contributors, will meet with care, and attention.

This charitable institution, although in its infancy, has already relieved a considerable number of sick and distressed persons: Its usefulness is daily increasing.

## Ministers in the Town of Boston.

Arranged according to the Time the Churches were founded.

First Church in Cornhill, John Clarke, D.D.

Second, or Old North Church, John Lathrop, D.D.

[The ancient Meeting House, being destroyed by the  
British, at the time of the blockade of Boston, in 1775,  
the Members of that Society have since united with  
the Church in Middle-street,]

First Baptist Church, Back-street, Samuel Stillman, D.D.

Old South Church, Marlboro'-street, Joseph Eckley, D.D.

Stone Chapel, e. South School-street, James Freeman.

Church in Brattle-street, Peter Thatcher, D.D.

Quaker's Meeting House, in Leverett's Lane.

New North Church, North-street, John Eliot.

New South Church, Summer-street, John T. Kirkland.

Christ Church, E. Salem-street, William Walter, D.D.

Church in Federal-street, Jeremy Belknap, D.D.

Church in Hollis-street, South End, Samuel West.

Trinity Church, E. Summer-street, Samuel Parker, D.D.

John Sylvester John Gardiner, Assistant Minister.

West Church, New-Boston, Simeon Howard, D.D.

Second Baptist Church, Back-street, Thomas Baldwin.

Sandemanians, Middle-street, below Cross-street.

Universalist Church, Bennet-street, John Murray.

Romish Church, So. School-street, Francis Matignoa, D.D.

Methodist Society, near Salutation Alley, North-End.

The Methodists have no settled Ministers, but their  
Churches are regularly supplied with Preaching, accord-  
to their Rules of Discipline, by Itinerant Preachers, who  
are frequently changed, for which reason their Names  
are not inserted at the Towns.

The other Churches, &c. in the County of Suffolk, are,  
Church at Chelsea, Phillips Payson.

Henry Ware,

Daniel Shute, D.D.

Pastors of the Churches

at Hingham.

Church at Hull, or Nantasket, vacant.

By the Laws of this Commonwealth each Town is to take  
care from time to time to be constantly provided with  
an able, learned, orthodox Minister or Ministers.

- \* Pews, and Rights in Houses of public Worship, by an Act of this Commonwealth, passed in February 1796, are considered and deemed to be Real Estate.

*Congregational Convention of Ministers,*  
in the Commonwealth of Massachusetts.

Their Meeting is held in Boston on the Thursday next following the last Wednesday in May annually ; on which day, at noon, after transacting the usual business of the Convention, a Sermon is preached in public before them, and a collection made for the charitable purpose of relieving distressed Clergymen or their Widows.—

The Congregational Ministers, in general, in the several Counties, are associated, and have their stated Meetings ; Their principal design is “ to open & maintain a friendly correspondence with the representative bodies of the Presbyterian and Congregational Ministers and Churches in other States, and to communicate to, and receive from them whatever may be useful and promote the interests of the Christian Religion ; and to collect an accurate statement of the number and names of the Associations, Ministers, Vacancies, Candidates, and non-associated Ministers and Churches throughout the Commonwealth, and to digest and publish the same, for their own information, and that of their brethren in other States.”

All the Congregational Ministers in the Towns of Boston, Roxbury, and Charlestown, are associated.

The Convention, solicitous to collect and preserve accurate documents for a history of their Churches, have

*Voted*, “ That all the Congregational Ministers in the Commonwealth of Massachusetts be requested to give a history of their respective Churches, and of the Churches in their vicinity, if vacant, and to make returns, as soon as may be convenient, to the Rev. D<sup>r</sup>. Belknap, of Boston, to be by him kept on file, after having been fairly recorded by the Scribe of the Convention, in a book to be kept by him for that purpose.”

Convention *Matters continued.**Commonwealth of Massachusetts, in May, 1795.*

*Voted, "THAT* a Committee consisting of Members of this Convention residing in different parts of this Commonwealth, be appointed for the purpose of certifying the good character and qualifications of our Ministers and Candidates, who shall pass from our limits into those of our Reverend Brethren in the other American States; and that this Committee take care that such travelling Ministers and Candidates, be regularly handed, and sufficiently recommended, to and by intermediate Ministers or other respectable Characters, till they reach the place of their destination. And the more effectually to secure the object of this Vote, this Convention further agree, mutually to communicate and receive the Names of Committees appointed by ourselves, and our brethren in the other States, for the purpose aforesaid; and that every Certificate be signed by one Gentleman at least on that Committee, from whose bounds the Person certified travels.

*Voted,* That the following Members of this body be our Committee for the purpose above-mentioned, viz.

<i>Rev. S. West, D.D. Stockbridge</i>	<i>Rev. Jason Haven, Dedham,</i>
<i>Seth Swift, Williamstown</i>	<i>Ezra Weid, Braintree,</i>
<i>Jos. Lathrop, D.D. W. Spring.</i>	<i>John Reed, Bridgewater,</i>

*Extracts concerning MASONRY.*

“**PYTHAGORAS**, a Grecian, journeyed for knowledge in Egypt and Syria, and in every land where the Phenicians had planted Masonry, and gaining entrance in all Lodges of Masonry, he learned much and returned, and dwelt in great Greece, growing and becoming a mighty Philosopher, and greatly renowned, and there he framed a great Lodge at Cretona, and made many Masons, some whereof died journeying into France, and made many Masons, wherefrom in process of time, the Art passed into England

“Pythagoras, when he journeyed to learn, was first made then taught; even so should all others be in right. Nevertheless, Masons have always in every time, from time to time communicated to mankind such of their Secrets as generally might be useful, they have kept back such only as might be harmful if they came into evil hands, or such as might not be beneficial without the teachings joined there-together, within the Lodge, or such as do bind the brethren more strongly by the profit and convenience coming to the Fraternity therefrom.” —

The first Mason Lodge in America was held in Boston on the 30th of July 1733, by virtue of a commission from the Right Honorable and Right Worshipful *Anthony Lord Viscount Montague*, Grand Master of England, in the year of Masonry 5733, constituting the Right Worshipful *Henry Price* Grand Master in North America, with full power and authority to depute his Deputy-Grand Master and other masonic officers; as also to constitute Lodges of free and accepted Masons, as often as occasion should require. —

The Grand Lodge of the most ancient and honorable Fraternity of free and accepted Masons, in Massachusetts, was organized April 19, A. D. 1792, being formed by a com'eat coalition of the late *St. John's* and the late *Massachusetts Grand Lodges*. —

*For the Massachusetts Register.*

**I**T is a singular Trait in the Constitutions of the respective States forming the Union, that Religion is in each of them placed on its proper Basis; aided by the Reason of each individual Citizen, and not necessitated to look to the unwarranted Mandate of the civil Arm for it's Support. It ever should be an Object in every Nation, where ecclesiastical Tyranny does not predominate, to leave Religion to the Support of its own Evidence, to the correspondent Lives and Conversation of those Individuals who may have been led to make a profession of it, and to its divine Author—Such is the generous and justifiable Liberality pervading the United States of America, that not *any one* particular Denomination has Sanction by Test or Establishment; and, *every* Denomination has such Toleration as they can possibly wish, provided the same Toleration may not interfere with the public Good. In consequence of which Liberality we find a very extensive Ramification, considering that our Forefathers emigrated upon the deficiency of Toleration in respect of Liberty in the Exercise of Faith and Discipline.

Ignorance in the Individuals composing any State or Nation is a very natural prelude to their Deprivation of their Liberties and their being involved in the Horrors of Slavery; while general Knowledge is a very natural Bar to such baneful Effects. Perhaps no people have distinguished themselves more in this respect than the people of America; as, in addition to a general attention to the Instruction of the rising Generation in the Support of Schools by Incorporation, and by ordinary Regulations in the respective States; there are now 7 Universities, 16 Colleges and 60 Academies in the United States of America.

Such general attention to the support of those two important Pillars of National Glory, *Religion and Literature*, affords some grounds for anticipating the happy Period when AMERICA shall embrace in its arms all that cannot elsewhere enjoy such privileges as she offers.

*[The foregoing Communication from a Friend to the Register was received by the publishers not quite early enough to be inserted in its more proper place.]*

 John Ross, Consul Gen. from *Hamburg*, at *Philadelphia*.

*Of Foreign Coins in the United States.*

BY an Act of Congress passed the 9th of Feb. 1793, for regulating Foreign Coins, &c. it was enacted, that at the expiration of three years next ensuing the time when the coinage of Gold and Silver should commence at the Mint of the United States (which time was to be announced by the President) all Foreign Gold Coins and all Foreign Silver Coins, except Spanish milled Dollars and parts of such Dollars, shall cease to be a legal tender for the payment of all debts and demands. —

Accordingly, in conformity to said act, the President of the United States, by Proclamation, July 22d 1797, announced and gave notice, that all Foreign Silver Coins, except Spanish milled Dollars and parts thereof, would cease to pass current as Money, within the United States, and to be a legal tender, after the 15th of October 1797, —and that all Foreign Gold Coins will cease to pass current as Money within the United States, and to be a legal tender, as aforesaid, after the 31st day of July. 1798.

Practitioners of the LAW, before admission are to take the following OATH in open Court.

YOU solemnly swear that you will do no falsehood, nor consent to the doing of any in Court, and if you know of an intencion to commit any, you will give knowledge thereof to the Court, or some of them, that it may be prevented: You will not unwittingly or willingly promote or sue any false, groundless, or unlawful Suit, nor give aid or consent to the same: You will delay no man for lucre or malice; but you will conduct yourself in the office of an Attorney within the Courts according to your best knowledge and discretion, and with all good fidelity, as well to the Court as your Clients. So help you God.

\* \* Tho' the preceeding Lists are perhaps as complete as could well be collected at the time, yet Information of any alterations or additions are still requested, that all necessary amendments may be made, and the work rendered as correct as its varying nature will admit.—

*Extract from a late additional Militia Law.*

**B**Y a Law of this Commonwealth passed Feb. 24th 1796, it is enacted, "That no non-commissioned officer or private, belonging to any company of militia shall be exempted from military duty on account of bodily infirmity, unless he shall obtain a certificate from the Surgeon or Surgeon's mate of the regiment to which he belongs, if either of those Officers are authorized in said regiment, if not, from a reputable Surgeon or Physician living within the limits of the same, that he is unable to do military duty by reason of bodily infirmity, the cause of which is to be described in said certificate; and the Officer commanding said company may upon the back of said certificate, discharge the person named therein from doing military duty in said company for such term of time as he shall judge reasonable; which certificate, if approved and countersigned by the Officer commanding the regiment, battalion or squadron, to which such person belongs shall intitle him to a full exemption from military duty for the term therein specified. — No appeal is allowed to either party, from the judgment of a Justice of the Peace upon any prosecution or complaint brought by any Clerk of a company of Infantry, Artillery or Cavalry, which the Militia Law requires to be prosecuted by said Clerks." —

## NAUTICAL INTELLIGENCE.

[Recommended to printers for publication by B. LINCOLN,  
Superintendent of Light-Houses, State of Massachusetts.]

## Light-House on Cape Cod.

**B**Y Order of the United States, a Light House has been erected at the *Clay Ponds*, on *Cape Cod*. (the lamps in which are now lighted.)—The Light-house is erected on land, elevated about 150 feet, which with the elevation of the *Lanthers*, makes the whole height 200 feet above high water mark. In order that this Light may be distinguished from the *Boston*, and other Lights on our coast, an *Eclipser* is erected, which will revolve around the lamps once in 80 seconds, so that the light will be nearly excluded from the eye of the approaching Mariner about 30 seconds, in one revolution of the eclipse. To render the benevolent designs of Congress as extensively useful as possible, the Marine Society in Boston, by a large Committee from their body, whose views have been seconded by others, have taken such distances and bearings as they thought necessary; which observations giving light and safety, are added for the benefit of all interested—and are as follows—

Vessels outward bound, from Boston Light-House, and would wish to fall in with Cape-Cod, the course is E.S.E. distance 15 leagues—thence 3 leagues to the Light-house. When up with the Lighthouse and it bears S W 2 leagues distance, you may then steer S S E which will carry you out of the south channel.

Vessels inward bound, and fall in with the back of Cape Cod, bring the Light to bear S W 2 leagues distance, when you may steer W N W for Boston Light-house.

If you would wish to go into Cape-Cod harbor, you may keep the shore aboard about a mile distant, where you will have 10 fathoms water. There is a bar lies off the back of the Cape, about half a mile from the shore.

When up with Race-point, which is very bold, and about 3 leagues to the westward of the Light-house, and may be known by a number of Fish-houses on it. From to 3 miles to the southward of Race-point, is what is called Herring Cove, where you may have good anchorage half a mile from the shore, the wind from E to N N E four or even in three fathom water.

If bound into Cape-Cod harbor, your course from Race-point to Wood-end, is S S E, 6 miles distance, bring the Light to bear E by N and run for it about 2 miles, you will then be clear of Wood-end—then you must steer N E until the Light bears E by S—then run N W for the harbor, until you have from 4 to 3 1-2 fathoms water, where you have good anchoring, the Light then will bear E by S 1-2 S, 5 or 6 miles distance.

In running from the Race-point to Wood-end—after you pass the Black-Land or Hammuck's, you will come up with a low sandy beach, which forms the harbour; extending between two and three miles to Wood-end, which is difficult to be distinguished in the night; it is very bold—you will have 25 fathoms water within half a mile of the shore.

In beating into Cape-Cod harbor, you must keep the Eastern shore aboard, until you get into 5 fathoms water. Stand no further to the westward than to bring the Light to bear E by S, as there is a long spit of sand runs off from the western shore, which being very bold, you will have 11 fathom water within stone's throw of the shore.

In case it blows so hard that you cannot beat into the harbor, you will have good anchoring without, from 10 to 15 fathom water.

Vessels in Boston bay and would wish to put away for Cape-Cod harbor, must endeavor to fall in with the Race. If in the night and you cannot see the land, you must bring the Light to bear E by N, and run for it until you have soundings in 14 or 15 fathom water---then steer N E until the Light bears E by S, then run in N W for the harbor.

At full and change, it is high water off Race-Point, at 10 o'clock, and 45 minutes. Vessels in leaving Cape-Cod, bound to Boston, should calculate the tide, as the flood sets strong to the south-west.

## SALEM Light-House, on BAKER'S ISLAND.

**B**AKER'S Island, on which the Light House has lately been erected, is about three eighths of a mile long, tending about North and South, the Lighthouse is on the Northernmost end of said island, with two Lights; those Lights are about 40 feet from each other, ranging N. W. a quarter W. and S. E. a quarter E. the South Light 95 feet from the surface of the water, and the North Light 78 feet.

Vessels inward bound, and falling in with Cape-Ann, may observe the following directions, *viz.* When abreast of Cape-Ann Lights, bearing N.N.W. about two miles distance, steer W.S.W. about three leagues, which brings them up with the Eastern point of Cape-Ann, then steer W.byS. 7 miles and a half, which brings them up with the Lights on Baker's Island.

Ships bound to Salem, and falling to the Southward in Boston Bay, and running for the Lights, when making the Lights, they must keep the North, and lowest Light, open to the Eastward of the Southern Light, and run for them, which will carry them to the Eastward and clear of the South Breaker of Baker's Island, which bears from the Lights S.E.byS. one mile and a half distance.

Vessels bound to Salem, having made the Lights with a westerly wind, in beating up, must not stand to the Southward and Westward, further than to shut one Light in with the other, on account of the South Breaker, nor to the Northward further than to bring the Lights to bear W.byS. half S. on account of Gale's Ledge, which bears from the Lights N.E. half E. 2 mile & 3 quarters distance.

In going into Salem, and being up with the Lights, give Baker's Island a birth of one quarter mile or less, then steer W.byN. and you will pass the Misery-Island, leaving it on your Starboard hand, which bears from the Lights N.W. half N. distance 4-5 of a mile, continue your course W.byN. one mile and a half, then you have passed Bowditch's Ledge, leaving it on your Larboard hand, where any stranger may anchor in safety, in about 5 fathoms water, good anchoring ground. But if you choose to proceed into Salem harbor, then steer West, until abreast of the Haff, which you will leave on your Larboard hand, about half a mile distance, then steer S.W.byW. which will carry you into Salem harbor.

*N. B. Eastern-Point bears from Baker's-Island Lights, E. by N. half N. 7 and a half miles distance. Half-Way Rock bears from the Lights South a quarter E, three and a quarter miles distance. Harding's Rocks bear from the Lights W. three quarters N. distance half a mile.*

} Committee from the  
Marine Society  
of Salem.

At a Meeting of the Marine Society held at Marine-Hall, Wednesday, 6th of December 1797, the above report of its committee was read and approved, and ordered to be published.

By order of the Society,

BENJ A. WEST, Master.

JONA. MASON, Society's Clk.

*An expeditious and convenient Method of finding a Vessel's Burthen, or Gauging a Vessel by Gunter's Scale & Compasses, without the Use of a Pen.*

1. **E**XTend the Compasses from 95 on the Line of Numbers to the Breadth—the same Extent will reach from the Length of the Keel to a fourth Number: Or, Extend the Compasses from 95 on the Line of Numbers to the Length of the Keel:—the same Extent will reach from the Breadth to a fourth Number.

2. Extend the Compasses from 1 or Unity to the said fourth Number before found:—the same Extent will reach,

*For double deck'd Vessels from half the Breadth to the Tons:*

*For single deck'd Vessels, from the Depth to the Tons.*

Sometimes it may happen that the last Extent of the Compasses placed according to Rule will pass over the End of the Scale; in which case the Extent placed at one Quarter the Breadth for double deck'd Vessels, or at Half the Depth for single deck'd Vessels, will give one Half the Tonnage.

(The following is inserted at the request of the  
 MASSACHUSETTS CHARITABLE FIRE SOCIETY.)  
 DIRECTIONS for preventing CALAMITIES by FIRE.

1. **K**EEP your Chimnies and Stove-Pipes clean,  
 by sweeping them at least once every month.

2. Never remove hot ashes in a wooden vessel of any  
 kind, and look well to your ash-hole.

3. After sweeping a hearth, see that the brush does not  
 retain any particles of fire, before you hang it up in its  
 usual place.

4. Oblige all your servants to go to bed before you,  
 every night, and inspect all your fire places, before you  
 retire to rest.—For fear of accidents, let a bucket of wa-  
 ter be left in your kitchen every night. The writer of  
 these directions once saved his house from being consu-  
 med by fire, by this precaution.

5. Do not permit a servant to carry a candle to his  
 bed room, if he sleeps in an unplastered garret.

6. Cover up your fire carefully every night in ashes.  
 Let the unburnt parts of the billets or chunks of wood,  
 be placed next the hearth, but not set upright in the  
 corners, by which means no sparks will be emitted from  
 the wood. Pour a little water upon the burning ends of  
 the wood which are not completely covered by the ashes.  
 Place before the fire a fender made of sheet iron. This  
 contrivance was well known in England many years ago,  
 by the name of *Coverfeu*. It has lately received (from  
 a top being added to it) the name of *Hood*.

7. Remove papers and linen from near the fire to a  
 remote part of the room.

8. Shut the doors of all the rooms in which you leave  
 fire at night. By thus excluding the supply of fresh air, you  
 will prevent a flame being kindled, should a coal or spark  
 fall upon the floor, or upon any of the combustible matter  
 in the room. The smoke which issues from this smother'd  
 fire, will find its way into every part of the house, and  
 by waking the family may save it from destruction.

9. If sickness, or any other cause should oblige you to  
 leave a candle burning all night, place it in such a situa-  
 tion as to be out of the way of rats. A house was once  
 destroyed by a rat running away with a lighted candle for  
 the sake of the tallow, and conveying it into a hole filled  
 with rags, and inflammable matters.

10. Never read in bed by candle light, especially if your bed be surrounded by curtains.

11. Strictly forbid the use of segars in your family at all times, but especially after night. May not the greater frequency of fires in the United States than in former years, be ascribed in part to the more general use of segars by careless servants and children?—There is good reason to believe a house was lately set on fire by a half consumed segar, which a woman suddenly threw away to prevent being detected in the unhealthy and offensive practice of smoaking.

*IN case of fire attend to the following directions, to prevent or restrain its terrible consequences.*

1. Do not open the room or closet door where you suspect the fire to be, until you have secured your family, and your most valuable effects, nor until you have collected a quantity of water to throw on the fire, the moment a fresh supply of air excites it into a flame. Where water cannot conveniently be had, try to smother the fire by throwing two or three blankets over it. A British sea captain once saved a king's ship by throwing himself with a spread blanket in his arms, upon a fire which had broken out near the powder room. He was pensioned for life, for this wise and meritorious act.

2. In case it be impossible to escape by a stair-case from a house on fire, shut the door of your bed-chamber, and wait until help can be brought to secure your escape from a window.

3. If safety does not appear probable in this way, wrap yourselves up in a blanket, hold your breath, and rush through the flames. If water be at hand, first wet the blanket.

4. To prevent fire descending from the roof, or ascending from the first story, form by means of blankets or carpets, a kind of dam on each of the intermediate stories, near their stair-case, that shall confine the water that is thrown upon the roof, or into the windows. It will effectually check the progress of the fire downwards or upwards in brick or stone houses.

5. To prevent fire spreading to adjoining houses, cover them with wet blankets or carpets, or old sails.

6. To extinguish fire in a chimney, shut the doors and windows of the room. Throwing a quart or more of common salt into the fire. Hold, or nail a wet blanket before the fire place. If these means fail, throw a wet blanket down the chimney from the roof of the house.

*There is a method used in some countries of glazing chimnies when they are built, by burning common salt in them, which renders them so smooth that no soot can adhere to them. Chimnies so constructed can never take fire.*

Ladders are commonly used as the means of conveying persons from the windows of houses on fire. Would not a long and stiff pole, with a rope fixed on its upper end, be more portable, and convenient for this purpose?

The famous Mr. John Wesley when a child, was taken out of a window in his father's house whilst in flames, by one man standing upon the shoulders of another. This practice may be used to rescue persons from the first story of a house on fire, when other means cannot be had with sufficient convenience or expedition.

#### DIRECTIONS

*for the speedy and effectual extinguishing of FIRE.*

1. **L**ET water be impregnated with a solution of one or more of the following fixed salts. (1) Marine Salt. (2) Pot or Pearl-ashes. (3) Allum. (4) Copperas.

2. Let every family keep a hoghead, or at least a barrel of this impregnated water, which should frequently be stirred. It may be kept in warm weather in an out-house, in cold weather in a cellar.

3. In every engine house let a large butt mounted on wheels be kept ready for use. This may be drawn by a horse to any place where it may be wanted. To this butt let there be fixed one or two large wooden cocks, with a short leather hose to prevent waste.

4. Should a fire be of long continuance and in danger of spreading, an additional quantity of those salts pulverised being previously provided, will soon dissolve and mix with an additional quantity of water.

*The ADVANTAGES of such impregnated water, above common water, are as follows:*

1. It will damp or extinguish the fire instantaneously.
2. It will prevent the burnt wood from rekindling, for when the water is evaporated the salts remain. *Note.*

*Note,* To prove this let any person dip a brand of fire into common soap-lye, and then lay it on the hottest fire, or let him take the staves of a leach barrel in which soap has been kept, and put them in a glowing oven—and he will find that they will not *easily* kindle.

3. By reason of its superior weight, it may be thrown with greater force against the wind.

4. A very small quantity will do more execution, than a large quantity of simple water.

5. It may be used with more success in small than large Engines.

6. It will save much labour of pumping and handling of buckets, and prevent much waste of water as in the common method.

7. If a perforated plate of brass or copper like those on the extremity of the tube of a watering pot be fixed with a screw to the pipe of an engine, the water may be more equally distributed over the surface of burning wood, than by one single stream. This can be of use only in small Engines.

*To prevent Flakes of Fire from kindling when they fall on the wooden roofs of buildings.*

Take three parts (by measure) of air-slacked lime, two do. of finely sifted wood-ashes, and one do. of fine sand, grind them in oil to the consistence of paint, and lay on the mixture with a brush.

Two coats will be necessary; the first thin, the second as thick as it can be conveniently worked. This coating will harden by time, and is impenetrable by flakes or even coals of fire falling on it.
